Subject: NBH Modeling Update

Hi all,

Attached is an updated project schedule. In the attachment, the new entries are colored: the red Xs indicate recently completed components; the yellow highlighted cells are those components that have not been completed by their anticipated deadline.

Here's a quick agenda for our call.

1. Modeling component updates:
Field data collection and analyses
Hydrodynamic
Sediment transport
Contaminant transport
Food web

2. Ongoing data needs:
Updated bathymetry from Lower Harbor and Pilot Cap Site

3. Development of remedial scenarios

4. Additional topics/comments/questions.

We should plan on 1 hour 15 minutes to complete the call.

Please give me a call if you have any questions.

Thank you,

Karl
